Fiber to the Home (FTTH) and Power Outages

How battery backup works to ensure continued “911” communications...

Available for Purchase – 16 Hours of Additional Battery Backup – During a power outage, the existing FTTH battery backup that was installed inside your home or business is designed to provide up to eight (8) hours of talk time on a landline telephone thus maintaining your ability to connect to 911 emergency services. In order to extend the talk time by 16 hours for a total of 24 hours, you now have the option to purchase and self-install batteries. Depending on the equipment at your location, the price will be \$60.00 or \$220.00 plus tax. Please contact our business office at 641-486-2211 to purchase.

Please note the battery backup does not provide power to any service other than voice (Internet, TV service, home security systems, medical monitoring device and other equipment will not run on this backup battery).
